

SIMPLIFYING IT PROCUREMENT

Simplicity

CMT offers a single stop for ordering multiple products from multiple suppliers. Do all of your IT purchasing using a common process and knowledgeable source.

Cost-Savings

When buyers are allowed to focus on supplier management and contracting, your organization can benefit from significantly lower prices. Pre-negotiated, contracted pricing may be available for individual CMT customers looking to optimize cost-savings.

Productivity

Better manage and analyze your purchases through comprehensive reporting and yearly account review practices when working with CMT. Relationships with too many or multiple technology vendors result in operational inefficiencies.

Multiple Products—One Source

Managing the procurement of IT products and services can be challenging. Regardless of the size of your organization, purchasing needs to be managed efficiently to realize increased productivity and direct cost savings. Procuring through CMT connects you with leading Tier 1 technology suppliers in storage, server, software and services. We've been in business since 1984 and have exceptional credit lines, negotiable credit term agreements, and multiple leasing options for hardware—all for a positive impact on your bottom line.
